1. IMPORTANT SAFEGUARDS

When using electrical appliances, basic safety precautions should always be followed, including the following.

- Read all instructions carefully.
- Make sure the voltage of your electrical system corresponds to the voltage shown on the bottom of the machine.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against fire, electrical shock and personal injury, do not immerse cord, plug or appliance in water or other liquid.
- Keep the appliance out of the reach of children and do not leave appliance unattended while in operation.
- Unplug from the outlet when not in use and before cleaning.
- Do not operate with a damaged cord or plug, or after the appliance malfunctions, or has been damaged in any manner. Return the appliance to the nearest authorized service facility for examination, repair or adjustment.
- The use of accessory attachments not recommended by the manufacturer may result in fire, electrical shock, or personal injury.
- Do not use outdoors.
- Make sure the power cord does not hang over the edge of the table or counter-top to avoid getting accidentally caught or entangled.
- Do not place the appliance or its electrical parts on or near electric stoves, cooking surfaces, or gas burners.
- Plug cord into the wall outlet. To disconnect, first turn machine “off”, then remove plug from wall outlet.
- Do not use the appliance for other than the intended use. This appliance is to be utilized for domestic use only. The manufacturer declines all responsibility for any damage caused by improper, incorrect, or irresponsible use.

WARNING: To reduce the risk of fire or electric shock, do not remove the cover or the exterior of the unit. Don’t attempt to repair or modify the machine, doing so will void the warranty. Repair should be done by authorized service personnel only!

1.1 SAVE THESE INSTRUCTIONS
THIS APPLIANCE IS FOR HOUSEHOLD USE ONLY

1.2 Short cord instructions

- A short power cord is provided to reduce risks resulting from becoming entangled in or tripping over a longer cord.
- Longer, detachable power supply cords or extension cords are available and may be used if care is exercised in their use.
- If an extension cord is used, the marked electrical rating should be at least as great as the electrical rating of the appliance. If the appliance is provided with 3- wire, grounding type cord, the extension should be a GROUNDING TYPE 3 - WIRE CORD. The longer cord should be arranged so that it will not drape over the counter-top or table top where it can be pulled on by children or tripped over.
- Your product is equipped with a polarized alternating current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.
2. INTRODUCTION
Thank you for choosing the ECAM4466X automatic coffee and cappuccino maker.
We hope you enjoy using your new appliance.
Take a few minutes to read these instructions.
This will avoid all risks and damage to the machine.

2.1 Symbols used in these instructions
Important warnings are identified by these symbols.
It is vitally important to observe these warnings.
⚠️ Danger!
Failure to observe the warning could result in life threatening injury from electric shock.
⚠️ Important!
Failure to observe the warning could result in injury or damage to the appliance.
⚠️ Danger of burns!
Failure to observe the warning could result in scalds.
ℹ️ Please note:
This symbol identifies important advice or information for the user.

2.2 Letters in brackets
The letters in brackets refer to the legend in the Description of the Appliance on page 3.

2.3 Troubleshooting and repairs
In the event of problems, first try and resolve them following the information given in the section “16. DISPLAYED MESSAGES” and “17. TROUBLESHOOTING”.
If this does not resolve the problem or you require further information, you should consult Customer Experience by calling the number given on the annexed “Customer Experience” sheet.
If your country is not among those listed on the sheet, call the number given in the guarantee.
If repairs are required, contact De’Longhi Customer Experience only.
Contact details are given in the guarantee certificate provided with the appliance.

2.4 Video instruction manual available on:
http://ecam44660.delonghi.com

3. DESCRIPTION

3.1 Description of the appliance
(page 3 – A)
A1. Beans container lid
A2. Pre-ground coffee funnel lid
A3. Beans container
A4. Pre-ground coffee funnel
A5. Grinding adjustment dial
A6. Cup shelf
A7. Coffee spouts (adjustable height)
A8. Hot water connection nozzle
A9. Condensate tray
A10. Coffee grounds container
A11. Cup tray
A12. Drip tray
A13. Drip tray water level indicator
A14. Infuser door
A15. Infuser
A16. Water tank
A17. Water softener filter housing
A18. Water tank lid
A19. Main switch

3.2 Description of the control panel
(page 2 – B)
A number of buttons on the panel have a double function. This is indicated in brackets in the description.
B1. button: turns the appliance on and off (standby)
B2. MENU/ESC button to access the menu (When in the settings menu, press to exit the menu)
B3. OK button: to enable and confirm the selected function
B4. Display: guides the user in using the appliance
B5. button: to select the coffee quantity
B6. aroma selection button: to select the coffee taste
B7. button to deliver hot water
B8. button: to make 1 cup of LONG coffee
B9. CAPPUCCINO button: to deliver a cappuccino (When in the settings menu, press to scroll through the menu items)
B10. MILK MENU button: to access preparation of CAFFELATTE, LATTE MACCHIATO, FLAT WHITE and MILK (When in the settings menu, press to scroll through the menu items)
B11. button: to make 1 cup of coffee with the settings displayed
B12. button: to make 2 cups of coffee with the settings displayed
3.3 Description of the accessories
   (page 2 - C)
   C1. “Total Hardness Test” indicator paper
   C2. Pre-ground coffee measure
   C3. Descaler
   C4. Water softener filter (certain models only)
   C5. Cleaning brush
   C6. Hot water spout

3.4 Description of the milk container
   (page 2 - D)
   D1. Froth adjustment and CLEAN dial
   D2. Milk container lid
   D3. Milk container
   D4. Milk intake tube
   D5. Frothed milk spout (adjustable)

4. BEFORE USE

4.1 Checking the appliance
After removing the packaging, make sure the product is complete and undamaged and that all accessories are present. Do not use the appliance if it is visibly damaged. Contact De’Longhi Customer Services.

4.2 Installing the appliance

   ! Important!
   When you install the appliance, you should respect the following safety warnings:
   • The appliance gives off heat. After positioning the appliance on the worktop, leave a space of at least 3 cm between the surfaces of the appliance and the side and rear walls and at least 15 cm above the coffee maker.
   • Water penetrating the coffee maker could cause damage. Do not place the appliance near taps or sinks.
   • The appliance could be damaged if the water it contains freezes. Do not install the appliance in a room where the temperature could drop below freezing point.
   • Arrange the cord in such a way that it cannot be damaged by sharp edges or contact with hot surfaces (e.g. electric hot plates).

4.3 Connecting the appliance

   ! Important!
   Check that the mains power supply voltage corresponds to that indicated on the rating plate on the bottom of the appliance. Connect the appliance to an efficiently earthed and correctly installed socket with a minimum current rating of 10A only.

   If the power socket does not match the plug on the appliance, have the socket replaced with a suitable type by a qualified professional.

4.4 Setting up the appliance

   ! Please note!
   • Coffee has been used to factory test the appliance and it is therefore completely normal for there to be traces of coffee in the mill. The machine is, however, guaranteed to be new.
   • The appliance is set with ENGLISH language: if you want to change the language, please see paragraph “7.11 Setting the language”.
   • You should customise water hardness as soon as possible following the instructions in section “13.2 Setting water hardness”.

1. Connect the appliance to the mains electricity supply (fig. 1) and make sure the main switch (A19) at the back of the appliance is pressed down (fig. 2).
2. Remove the water tank (A16) (fig. 3), open the lid (A18) (fig. 4), fill to the MAX line with fresh water (fig. 5), replace the lid and put the tank back in the appliance.
3. “INSERT WATER SPOUT”: Check that the hot water spout (C6) is inserted on the connection nozzle (A8) and place a container holding a minimum of 33,38 fl.oz/100 ml underneath (fig. 8).
4. “HOT WATER Press OK” is displayed;
5. Press the OK button to confirm. The appliance delivers water from the spout then goes off automatically.
The coffee machine is now ready for normal use.

   ! Please note!
   • When setting up the appliance, you need to make 4-5 cups of coffee or 4-5 cappuccinos before the appliance starts to give satisfactory results.
   • When making the first 5-6 cappuccinos, it is normal to hear the noise of boiling water. After this, the noise becomes less.
   • To enjoy your coffee even more and improve the performance of your appliance, we recommend installing a water softener filter (C4) as described in section “14. WATER SOFTENER FILTER”. If your model is not provided with a filter, you can request one from De’Longhi Customer Services.
5. TURNING THE APPLIANCE ON

Please note!
Before turning the appliance on, make sure the main switch (A19) is pressed (fig. 2).
Each time the appliance is turned on, it performs an automatic preheat and rinse cycle which cannot be interrupted. The appliance is ready for use only after completion of this cycle.

Danger of burns!
During rinsing, a little hot water comes out of the coffee spouts (A7) and is collected in the drip tray (A12) underneath. Avoid contact with splashes of water.

• To turn the appliance on, press the button (B1 - fig. 9). The message “Heating up, Please wait” appears on the display (B4).
When heating is complete, the message changes to “RINSING”.
As well as heating the boiler, this also heats the internal circuits by circulating hot water.
The appliance is at temperature when the message indicating the taste and quantity of coffee appears.

6. TURNING THE APPLIANCE OFF
Whenever the coffee machine is turned off after being used to make coffee, it performs an automatic rinse cycle.

Danger of burns!
During rinsing, a little hot water flows from the coffee spouts (A7). Avoid contact with splashes of water.

• To turn the appliance off, press the button (B1 - fig. 9).
• The message “Turning off underway Please wait” appears on the display (B4), then the appliance performs a rinse cycle and goes off (standby).

Please note!
If you will not be using the appliance for some time, unplug from the mains socket:
• first turn the appliance off by pressing the button;
• release the main switch (A19) at the back of the appliance (fig. 2).

Important!
Never press the main switch while the appliance is on.

7. MENU SETTINGS

7.1 Rinsing
Use this function to deliver hot water from the coffee spouts (A7) and hot water spout (C6), if inserted, to clean and heat the appliance’s internal circuit.

Place a container with a minimum capacity of 100ml under the coffee and hot water spouts (fig. 8).
To enable the function, proceed as follows:
1. Press the MENU/ESC button (B2) to enter the menu;
2. Press < (B9) or > (B10) (fig. 6) until “Rinsing” appears on the display (B4);
3. Press the OK button (B3 - fig. 7): the message “Confirm?” is displayed;

Important! Danger of burns.
Do not leave the appliance unattended while hot water is being delivered.

4. Press the OK button. “RINSING Please wait” is displayed;
5. After a few seconds, hot water is delivered first from the coffee spouts, then from the hot water spout (if inserted) to clean and heat the appliance’s internal circuit. “RINSING” is displayed, together with a progress bar which fills gradually as preparation proceeds;
6. To stop the process press any button or wait for delivery of water to stop automatically.

Please note!
• If the appliance is not used for more than 3-4 days, we strongly recommend, when switching on the appliance, performing 2/3 rinses before using it;
• After cleaning, it is normal for the coffee grounds container (A10) to contain water.

7.2 Descaling
For instructions on descaling, see section “12. DESCALING”.

7.3 Installing the filter
For instructions on how to install the filter, see section “14. WATER SOFTENER FILTER”.

7.4 Replacing the water softener filter (if installed)
For instructions on how to replace the filter, see section “14.2 Replacing the filter”.

7.5 Adjust time
To adjust the time on the display, proceed as follows:
1. Press the MENU/ESC button (B2) to enter the menu;
2. Press < (B9) or > (B10) (fig. 6) until “Adjust time” appears on the display (B4);
3. Press the OK button (B3 - fig. 7): the hours flash on the display;
4. Press < or > to change the hour;
5. Press the OK button to confirm. The minutes flash;
6. Press < or > to change the minutes;
7. Press the **OK** button to confirm.
   The time is set. Press the **MENU/ESC** button to exit the menu.

---

### 7.6 Auto-start

You can set the auto-start time in order to have the appliance ready at a certain time (for example in the morning) so you can make coffee immediately.

**Please note!**

To enable this function, the time must already be set correctly.

To enable auto-start, proceed as follows:

1. Press the **MENU/ESC** button (B2) to enter the menu;
2. Press `≪` (B9) or `≫` (B10) (fig. 6) until “Auto-start” appears on the display (B4);
3. Press the **OK** button (B3 - fig. 7). “Enable?” is displayed;
4. Press the **OK** button to confirm;
5. Press `≪` or `≫` to choose the hour;
6. Press the **OK** button to confirm;
7. Press `≪` or `≫` to change the minutes;
8. Press the **OK** button to confirm;
9. Press the **MENU/ESC** button to exit the menu.

Once the time has been confirmed, activation of auto-start is indicated by the symbol displayed alongside the time.

To disable the function:

1. Select auto-start from the menu;
2. Press the **OK** button. “Disable?” is displayed;
3. Press the **OK** button to confirm.

The symbol is no longer displayed.

---

### 7.7 Auto-off (standby)

Auto-off can be set so that the appliance goes off after 15 or 30 minutes, or 1, 2 or 3 hours.

To programme Auto-off, proceed as follows:

1. Press the **MENU/ESC** button (B2) to enter the menu;
2. Press `≪` (B9) or `≫` (B10) (fig. 6) until “Auto-off” appears on the display (B4);
3. Press the **OK** button (B3 - fig. 7);
4. Press `≪` or `≫` until the required operating time (15 or 30 minutes, or 1, 2 or 3 hours) is displayed;
5. Press the **OK** button to confirm;
6. Press the **MENU/ESC** button to exit the menu.

Auto-off is programmed.

---

### 7.8 Energy saving

Use this function to enable or disable energy saving. When enabled, the function reduces energy consumption in compliance with European regulations.

To disable (or enable) energy saving, proceed as follows:

1. Press the **MENU/ESC** button (B2) to enter the menu;
2. Press `≪` (B9) or `≫` (B10) (fig. 6) until “Energy saving” appears on the display (B4);
3. Press the **OK** button (B3 - fig. 7). “Disable?” is displayed; (or “Enable?” if the function has been disabled);
4. Press the **OK** button to disable (or enable) energy saving mode;
5. Press the **MENU/ESC** button to exit the menu.

When the function is active, if the machine is not used for some time, “Energy saving” is displayed.

**Please note!**

- When in energy saving mode, a few seconds elapse before the first coffee, cappuccino or milk based coffee is delivered as the appliance must heat up again.
- To prepare any drink, press any button to exit energy saving, then press the button corresponding to the drink you want to make.
- If the milk container (D) is inserted, “Energy saving” cannot be activated.

---

### 7.9 Set temperature

To modify the temperature of the water used to make the coffee, proceed as follows:

1. Press the **MENU/ESC** button (B2) to enter the menu;
2. Press `≪` (B9) or `≫` (B10) (fig. 6) until “Set temperature” appears on the display (B4);
3. Press the **OK** button (B3 - fig. 7);
4. Press `≪` or `≫` until the required temperature is displayed (`●` = low; `●●●●` = maximum);
5. Press the **OK** button to confirm;
6. Press the **MENU/ESC** button to exit the menu.

---

### 7.10 Setting water hardness

For instructions on setting water hardness, see section “13. SETTING WATER HARDNESS”.

---

### 7.11 Setting the language

To modify the language of the display (B4), proceed as follows:

1. Press the **MENU/ESC** button (B2) to enter the menu;
2. Press `≪` (B9) or `≫` (B10) (fig. 6) until “Set language” appears on the display (B4);
3. Press the **OK** button (B3 - fig. 7);
4. Press `≪` or `≫` until the required language is displayed;
5. Press the **OK** button to confirm;
6. A message confirming the language installed is displayed;
7. Press the **MENU/ESC** button to exit the menu.
7.12 **Beep**
This enables or disables the beep emitted by the machine each time a button is pressed or an accessory is inserted/removed. To disable or re-enable the beep, proceed as follows:
1. Press the **MENU/ESC** button (B2) to enter the menu;
2. Press the `< (B9)` or `> (B10)` button (fig. 6) until “Beep” appears on the display (B4);
3. Press the **OK** button (B3 - fig. 7): the message “Disable?” is displayed; (or “Enable?”, if disabled);
4. Press the **OK** button to enable or disable the beep;
5. Press the **MENU/ESC** button to exit the menu.

7.13 **Default values (reset)**
This resets all menu settings and programmed quantities back to the default values (with the exception of the language which remains as set).
To reset the default values, proceed as follows:
1. Press the **MENU/ESC** button (B2) to enter the menu;
2. Press the `< (B9)` or `> (B10)` button (fig. 6) until “Default values” appears on the display (B4);
3. Press the **OK** button (B3 - fig. 7);
4. The message “Confirm?” is now displayed;
5. Press the **OK** button to confirm and exit.

7.14 **Statistics function**
This displays statistics relating to the machine. To display, proceed as follows:
1. Press the **MENU/ESC** button (B2) to enter the menu;
2. Press the `< (B9)` or `> (B10)` button (fig. 6) until “Statistics” appears on the display (B4);
3. Press the **OK** button (B3 - fig. 7);
4. By pressing `< or >` you can check:
   - how many coffees have been made;
   - the total number of cappuccinos and milk based coffees;
   - the total number of litres of water delivered;
   - how many times the machine has been descaled;
   - how many times the water softener filter has been replaced.
5. Press the **MENU/ESC** button twice to exit the menu.

8. **MAKING COFFEE**
8.1 **Selecting the coffee taste**
The appliance is set by default to make coffee with a standard taste.
You can also choose one of these tastes:
Extra mild taste
Mild taste
Standard taste
Strong taste
Extra-strong taste
To change the taste, press the ☕ button (B6 - fig. 10) repeatedly until the required taste appears on the display (B4).

8.2 **Selecting the quantity of coffee in the cup**
The appliance is set by default to make a standard quantity of coffee. To select the quantity of coffee, press the ☕ button (B15 - fig. 11) until the message corresponding to the required quantity of coffee appears on the display (B4):

<table>
<thead>
<tr>
<th>Coffee selected</th>
<th>Quantity in cup (fl.oz/ml)</th>
</tr>
</thead>
<tbody>
<tr>
<td>MY COFFEE</td>
<td>Programmable: from ≃0,68/20 to ≃6,09/180</td>
</tr>
<tr>
<td>SHORT</td>
<td>≃1,35/40</td>
</tr>
<tr>
<td>STANDARD</td>
<td>≃2,03/60</td>
</tr>
<tr>
<td>LONG</td>
<td>≃3,04/90</td>
</tr>
<tr>
<td>EXTRA LONG</td>
<td>≃4,06/120</td>
</tr>
</tbody>
</table>

8.3 **Customising the “my coffee” quantity**
The appliance is set by default to automatically deliver 30 ml of “MY COFFEE”. To modify this quantity, proceed as follows:
1. Place a cup under the coffee spouts (A7 - fig. 12).
2. Press the ☕ button (B5 - fig. 11) until “MY COFFEE” is displayed.
3. Keep the ☕ button (B11) (fig. 16) pressed until the message “1 MY COFFEE Program quantity” is displayed and coffee delivery begins. Release the button;
4. As soon as the coffee in the cup reaches the required level, press the ☕ button again.
The quantity of coffee in the cup has now been programmed.

8.4 **Adjusting the coffee mill**
The coffee mill is set by default to prepare coffee correctly and should not require regulating initially.
However, if after making the first few coffees you find that the coffee is either too weak and not creamy enough or delivery is too slow (a drop at a time), this can be corrected by adjusting the grinding adjustment dial (A5 - fig. 13).

ℹ️ **Please note!**
The grinding adjustment dial must only be turned when the coffee mill is in operation.
If the coffee is delivered too slowly or not at all, turn one click clockwise towards “7”. For fuller bodied creamier coffee, turn one click anticlockwise towards “1” (do not turn more than one click at a time otherwise the coffee could be delivered a drop at a time). These adjustments will only be evident after at least 2 cups of coffee have been delivered. If this adjustment does not obtain the desired result, turn the dial another click.

8.5 Tips for a hotter coffee
For hotter coffee, you should:
- perform a rinse cycle by selecting the “Rinse” function in the settings menu (see section “7.1 Rinsing”);
- warm the cups with hot water (using the hot water function);
- set a hotter coffee temperature in the settings menu (see section “7.9 Set temperature”).

8.6 Making coffee using coffee beans

⚠️ Important!
Do not use caramelised or candied coffee beans as they could stick to the coffee mill and make it unusable.

1. Fill the container (A3 - fig. 14) with coffee beans;
2. Place under the coffee spouts (A7):
   - 1 cup, if you want to make 1 coffee (fig. 12);
   - 2 cups, if you want 2 coffees (fig. 15);
3. Lower the spouts as near as possible to the cup (fig. 15). This makes a creamier coffee;
4. Press the button corresponding to the number of coffees required (обр B11 for one cup, or obr obsc for two cups) (fig. 16);
5. Preparation begins. The amount of coffee selected appears on the display (B4) together with a progress bar which gradually fills as preparation progresses.

⚠️ Please note:
- While the machine is making coffee, delivery can be interrupted at any moment by pressing any button.
- At the end of delivery, to increase the quantity of coffee in the cup, just press (within 3 seconds) one of the coffee buttons (обр or obr obsc).

Once the coffee has been made, the appliance is ready to make the next drink.

⚠️ Please note!
- Various alarm messages could be displayed while using the machine (FILL TANK, EMPTY GROUNDS CONTAINER, etc.). Their meaning is explained in section “16. DISPLAYED MESSAGES”.
- For hotter coffee, see section “8.5 Tips for a hotter coffee”.
- If the coffee is delivered a drop at a time, too weak and not creamy enough or too cold, read the tips in section “17. TROUBLESHOOTING”.

8.7 Making coffee using pre-ground coffee

⚠️ Important!
- Never add pre-ground coffee when the machine is off or it could spread through the inside of the machine and dirty it. This could damage the appliance.
- Never use more than 1 level measure (C2) or it could dirty the inside of the coffee machine or block the funnel (A4).

⚠️ Please note!
If you use pre-ground coffee, you can only make one cup of coffee at a time.

1. Press the button (B6) (fig. 10) until “Pre-ground” appears on the display (B4).
2. Open the pre-ground coffee funnel lid (A2).
3. Make sure the funnel (A4) is not blocked, then add one level measure of pre-ground coffee (fig. 17).
4. Place a cup under the coffee spouts (A7 - fig. 12).
5. Press the 1 cup coffee button (B11) (fig. 16).
6. Preparation begins. The amount of coffee selected is displayed together with a progress bar which gradually fills as preparation progresses.

⚠️ Please note!
If “Energy Saving” mode is active, you may have to wait a few seconds before the first coffee is delivered.

8.8 Making LONG coffee using coffee beans
Follow the instructions in the section “8.6 Making coffee using coffee beans” to prepare the machine, then press the button (B8) (fig. 18).

8.9 Making LONG coffee using pre-ground coffee
Follow the instructions in points 1, 2, 3 and 4 of the section “8.7 Making coffee using pre-ground coffee”, then press the button (B8) (fig. 18).

The appliance starts making coffee and displays a progress bar. Halfway through preparation, the message “ADD PRE-GROUND COFFEE, Press OK” appears. Add one level measure (C2) of pre-ground coffee and press OK button (B3 - fig. 7). Preparation resumes and the appliance displays a progress bar which fills gradually as preparation proceeds.
8.10 Customising the “LONG coffee” quantity
The appliance is set by default to automatically deliver about 180ml of LONG coffee. To modify these settings, proceed as follows:
1. Place a sufficiently large cup or glass under the coffee spouts (A7-fig. 12).
2. Press and hold the button (B8-fig. 18) until “Program quantity” is displayed.
3. Release the button. The appliance starts delivering coffee;
4. As soon as the coffee in the cup reaches the required level, press the button again.
The quantity of coffee in the cup has now been programmed.

Please note!
If the programme uses pre-ground coffee, the appliance will prompt you to add a second level measure (C2) of coffee.

9. MAKING CAPPUCINOS AND MILK BASED COFFEES

Please note!
• To avoid producing milk with poor froth or large bubbles, always clean the milk container lid (D2) and hot water connection nozzle (A8) as described in sections “9.5 Cleaning the milk container after every use”, “11.10 Cleaning the milk container” and “11.11 Cleaning the hot water connection nozzle”.

9.1 Filling and attaching the milk container
1. Remove the lid (D2) (fig. 19);
2. Fill the milk container (D3) with a sufficient quantity of milk, not exceeding the MAX level marked on the handle (fig. 20). Each mark on the side of the container corresponds to about 33,38 fl.oz/100 ml of milk;

Please note!
• For a denser more even froth, you must use skimmed or partially skimmed milk at refrigerator temperature (about 41°F/5°C).
• If “Energy saving” mode is enabled, you may have to wait a few seconds before the drink is delivered.
3. Make sure the milk intake tube (D4) is correctly inserted in the bottom of the milk container lid (fig. 21);
4. Place the lid back on the milk container;
5. Remove the hot water spout (C6) (fig. 22);
6. Attach the milk container (D) to the connection nozzle (A8-fig. 23) and push as far as it will go. The machine emits a beep (if the beep function is enabled);
7. Place a sufficiently large cup under the coffee spouts (A7) and frothed milk spout (D5). Adjust the length of the milk spout. To move it nearer the cup, simply pull it downwards (fig. 24).
8. Follow the instructions below for each function.

9.2 Adjusting the amount of froth
Turn the froth adjustment dial (D1) to adjust the amount of froth on the milk delivered while making cappuccino and milk based coffees.

<table>
<thead>
<tr>
<th>Dial position</th>
<th>Description</th>
<th>Recommended for…</th>
</tr>
</thead>
<tbody>
<tr>
<td>No froth</td>
<td>CAFFELATTE/ MILK (hot milk)</td>
<td></td>
</tr>
<tr>
<td>Min. froth</td>
<td>LATTE MACCHIATO / FLAT WHITE</td>
<td></td>
</tr>
<tr>
<td>Max. froth</td>
<td>CAPPUCINO/ MILK (frothed milk)</td>
<td></td>
</tr>
</tbody>
</table>

9.3 Making cappuccino and milk based coffees automatically
The control panel (B) has a button (B9) for automatically preparing CAPPUCINO. Proceed as follows:
1. Fill the milk container (D) and attach it as described above.
2. Turn the froth adjustment dial (D1) on the milk container lid (D2) to the position corresponding to the required froth.
3. Press the CAPPUCINO button. The name of the drink appears on the display (B4) together with a progress bar which gradually fills as preparation progresses.
4. After a few seconds, frothed milk is delivered from the milk spout (D5) into the cup below. Then the machine automatically makes the coffee after delivering the milk.

9.4 Preparing “MILK MENU” drinks
Besides the drinks described above, the appliance automatically prepares CAFFELATTE, LATTE MACCHIATO, FLAT WHITE and MILK (hot milk).

To prepare one of these drinks, simply proceed as follows:
1. Fill the milk container (D) and attach it as described above;
2. Turn the froth adjustment dial (D1) on the milk container lid (D2) to the position corresponding to the required froth;
3. Press the MILK MENU button (B10);
4. Press < (B9) or > (B10) (fig. 6) until the required drink (CAFFELATTE, LATTE MACCHIATO, FLAT WHITE or MILK) appears on the display (B4);
5. Press the OK button (B3- fig. 7) to start delivery;
6. After a few seconds, frothed milk is delivered from the milk spout (D5) into the cup below. For drinks with coffee, the machine automatically makes the coffee after delivering the milk.

**Please note: general indications when preparing all milk based drinks**
- If you want to interrupt preparation during delivery, press any button.
- At the end of delivery, to increase the quantity of milk or coffee in the cup, just press and hold (within 3 seconds) the button corresponding to the drink being made.
- Do not leave the milk container out of the refrigerator for long periods. The warmer the milk (41°F/5°C is ideal), the poorer the quality of froth produced.

9.5 Cleaning the milk container after every use

**Important! Danger of burns**
When cleaning the internal tubes of the milk container, a little hot water and steam leak out of the frothed milk spout (D5). Avoid contact with splashes of water.
“SET DIAL TO CLEAN” appears on the display (B4) each time you use a milk function. To eliminate all milk residues, proceed as follows:
1. Leave the milk container (D) in the machine (you do not need to empty it);
2. Place a cup or other recipient under the milk spout (fig. 24).
3. Turn the froth adjustment dial (D1) to “CLEAN” (fig. 25). A progress bar appears and gradually fills as the operation proceeds together with “Cleaning underway”. Cleaning stops automatically.
4. Turn the dial back to one of the froth selections.
5. Remove the milk container and always clean the connection nozzle (A8) with a sponge (fig. 26).

**Please note!**
- To prepare a number of cappuccinos or milk based coffees, clean the milk container after you have prepared the last drink only.
- The milk container can be kept in the refrigerator.
- In some cases, to clean you must wait for the appliance to heat up.

9.6 Programming the quantity of coffee and milk in the cup for the CAPPuccino button
The appliance is set by default to automatically deliver standard quantities. To change these quantities, proceed as follows:
1. Place a cup under the coffee spouts (A7) and milk spout (D5);
2. Press and hold the CAPPuccino button (B9) until the name of the drink and “PROGRAM MILK” appear on the display (B4);
3. Release the button. The appliance starts delivering milk;
4. Once the required quantity of milk has been delivered into the cup, press the button again;
5. The appliance stops delivering milk and, if required for the drink being prepared, after a few seconds the coffee is delivered into the cup. The name of the drink and “PROGRAM COFFEE” are displayed;
6. Once the required quantity of coffee has been delivered into the cup, press the button again. Coffee delivery stops.

The machine is now reprogrammed with the new milk and coffee quantities.

9.7 Programming the quantity of coffee and milk in the cup for MILK MENU drinks
The appliance is set by default to automatically deliver standard quantities. To change these quantities, proceed as follows:
1. Place a cup under the coffee spouts (A7) and milk spout (D5);
2. Press the MILK MENU button (B10);
3. Press < (B9) or > (B10) (fig. 6) until the required drink appears on the display (B4) (CAFFELATTE, LATTE MACCHIATO, FLAT WHITE, MILK);
4. Press and hold the OK button (B3 - fig. 7) until the name of the drink and “PROGRAM MILK” appear on the display;
5. Release the button. The appliance starts delivering milk;
6. Once the required quantity of milk has been delivered into the cup, press the OK button;
7. The appliance stops delivering milk and, if required for the drink being prepared, after a few seconds the coffee is delivered into the cup. The name of the drink and “PROGRAM COFFEE” are displayed;
8. Once the required quantity of coffee has been delivered into the cup, press the OK button again. Coffee delivery stops.

The machine is now reprogrammed with the new milk and coffee quantities.

10. DELIVERING HOT WATER

**Important! Danger of burns.**

Do not leave the appliance unattended while hot water is being delivered.
1. Make sure the hot water spout (C6) is attached correctly (fig. 8);
2. Place a container under the spout (as close as possible to avoid splashes);
3. Press the \( \mathbf{\Delta} \) button (B7). “HOT WATER” appears on the display (B4), together with a progress bar which fills gradually as preparation proceeds;
4. The machine delivers about 8,45 fl.oz/250ml of hot water, then delivery stops automatically. To interrupt delivery of hot water manually, press the \( \mathbf{\Delta} \) button again.

**Please note!**
If “energy saving” mode is active, you may have to wait a few seconds before the hot water is delivered.

### 10.1 Changing the quantity of water delivered automatically

The machine is set by default to automatically deliver 250 ml of hot water. To modify these quantities, proceed as follows:

1. Position a container under the spouts (C6);
2. Press the \( \mathbf{\Delta} \) button (B7) again until “HOT WATER Program quantity” appears on the display (B4), then release the \( \mathbf{\Delta} \) button;
3. When the hot water in the cup reaches the required level, press the \( \mathbf{\Delta} \) button again.

The machine is now reprogrammed with the new quantity.

### 11. CLEANING

#### 11.1 Cleaning the machine

The following parts of the machine must be cleaned regularly:
- the appliance’s internal circuit;
- coffee grounds container (A10);
- drip tray (A12) and condensate tray (A9);
- water tank (A16);
- coffee spouts (A7);
- pre-ground coffee funnel (A4);
- infuser (A15), accessible after opening the service door (A14);
- milk container (D);
- hot water connection nozzle (A8);
- control panel (B).

**Important!**
- Do not use solvents, abrasive detergents or alcohol to clean the coffee machine. With De’Longhi superautomatic coffee machines, you need not use chemical products to clean the machine.
- None of the components of the appliance can be washed in a dishwasher with the exception of the milk container (D).
- Do not use metal objects to remove encrustations or coffee deposits as they could scratch metal or plastic surfaces.

#### 11.2 Cleaning the machine’s internal circuit

If the appliance is not used for more than 3-4 days, before using it again, we strongly recommend switching it on and:
- performing 2-3 rinse cycles by selecting the “Rinse” function in the settings menu (see section “7.1 Rinsing”);
- delivering hot water for a few seconds by pressing the \( \mathbf{\Delta} \) button (B7).

**Please note!**
After cleaning, it is normal for the grounds container (A10) to contain water.

#### 11.3 Cleaning the coffee grounds container

When “EMPTY GROUNDS CONTAINER” appears on the display (B4), the grounds container (A10) must be emptied and cleaned. The appliance cannot be used to make coffee until you have cleaned the grounds container. Even if not full, the empty grounds container message is displayed 72 hours after the first coffee has been prepared. For the 72 hours to be calculated correctly, the machine must never be turned off with the main switch.

**Important! Danger of burns**
If you make a number of cappuccinos one after the other, the metal cup tray (A11) becomes hot. Wait for it to cool down before touching it and handle it from the front only.

To clean (with the machine on):
- Remove the drip tray (A12) (fig. 27), empty and clean.
- Empty the grounds container (A10) and clean thoroughly to remove all residues left on the bottom. This can be done using the spatula on the brush (C5) provided.
- Check the condensate tray (A9) and empty if necessary (fig. 28).

**Important!**
When removing the drip tray, the grounds container must be emptied, even if it contains few grounds. If this is not done, when you make the next coffees, the grounds container may fill up more than expected and clog the machine.

#### 11.4 Cleaning the drip tray and condensate tray

**Important!**
The drip tray (A12) is fitted with a level indicator (A13) (red) showing the level of water it contains (fig. 29). Before the indicator protrudes from the cup tray (A11), the drip tray must be emptied and cleaned, otherwise the water may overflow the edge and damage the appliance, the surface it rests on or the surrounding area. To remove the drip tray:
1. Remove the drip tray and the grounds container (A10) (fig. 27);
2. Empty the drip tray and grounds container and wash them;
3. Check the condensate tray (A9) and empty if necessary;
4. Replace the drip tray and grounds container.

11.5 Cleaning the inside of the coffee machine

⚠️ Danger of electric shock!
Before cleaning internal parts, the machine must be turned off (see section “6. TURNING THE APPLIANCE OFF”) and unplugged from the mains power supply. Never immerse the coffee machine in water.
1. Check regularly (about once a month) that the inside of the appliance, accessible after removing the drip tray (A12) (fig. 27), is not dirty. If necessary, remove coffee deposits with the brush (C5) supplied and a sponge.
2. Remove all the residues with a vacuum cleaner (fig. 30).

11.6 Cleaning the water tank
1. Clean the water tank (A16) regularly (about once a month) and whenever you replace the water softener filter (C4) (if provided) with a damp cloth and a little mild washing up liquid;
2. Remove the filter (if present) and rinse with running water;
3. Replace the filter (if provided), fill the tank with fresh water and replace the tank;
4. (Models with water softener filter only) Deliver about 3.38 fl.oz/100 ml of hot water to reactivate the filter.

11.7 Cleaning the coffee spouts
1. Clean the coffee spouts (A7) regularly with a sponge or cloth (fig. 31);
2. Check that the holes in the coffee spouts are not blocked. If necessary, remove coffee deposits with a toothpick (fig. 31).

11.8 Cleaning the pre-ground coffee funnel
Check regularly (about once a month) that the pre-ground coffee funnel (A4) is not blocked. If necessary, remove coffee deposits with the brush (C5) supplied.

11.9 Cleaning the infuser
The infuser (A15) must be cleaned at least once a month.

⚠️ Important!
The infuser may not be extracted when the machine is on.
1. Make sure the machine is correctly turned off (see section “6. TURNING THE APPLIANCE OFF”);
2. Remove the water tank (A16-fig. 3);
3. Open the infuser door (A14) (fig. 32) on the right side of the appliance;
4. Press the two coloured release buttons inwards and at the same time pull the infuser outwards (fig. 33);
5. Soak the infuser in water for about 5 minutes, then rinse under the tap;
6. Use the brush (C5) to remove any coffee residues left in the infuser housing, visible through the infuser door;
7. After cleaning, replace the infuser by sliding it onto the internal support (fig. 34), then push the PUSH symbol fully in until it clicks into place;
8. Once inserted, make sure the two coloured buttons have snapped out (fig. 36);
9. Close the infuser door;
10. Put the water tank back.
11.10 Cleaning the milk container
To keep the frother efficient, every two days clean the milk container (D) as described below:

1. Remove the lid (D2);
2. Remove the milk spout (D5) and intake tube (D4) (fig. 37);
3. Turn the froth adjustment dial (D1) anticlockwise to the “INSERT” position (fig. 37) and pull it off upwards;
4. Wash all the components thoroughly with hot water and mild washing-up liquid. All components are dishwasher safe, placing them in the top basket of the dishwasher. Make sure there are no milk residues on the hollow and groove under the dial (fig. 38). If necessary, scrape the groove with a toothpick;
5. Rinse inside the froth adjustment dial seat with running water (fig. 39);
6. Check that the intake tube and spout are not clogged with milk residues;
7. Replace the dial (in correspondence to the word “INSERT”), spout and milk intake tube;
8. Place the lid back on the milk container (D3).

11.11 Cleaning the hot water connection nozzle
Each time you prepare milk, clean the connection nozzle (A8) with a sponge to remove milk residues from the gaskets (fig. 26).

12. DESCALING
Descaling the machine when the message “DESCALE” flashes on the display (B4).

⚠️ Important!
- Before use, read the instructions and the labelling on the descaler pack.
- You should use De’Longhi descaler only. Using unsuitable descaler and/or performing descaling incorrectly may result in faults not covered by the manufacturer’s guarantee.

1. Turn the appliance on and wait until it is ready for use;
2. Press the MENU/ESC button (B2) to access the menu;
3. Press + (B9) or - (B10) (fig. 6) until “Descale” appears on the display;
4. Select by pressing the OK button (B3-fig. 7). The message “Descaling Confirm?” is displayed;
5. Press the OK button again to confirm. “EMPTY DRIP TRAY” is displayed, alternating with “REMOVE FILTER” (if the filter is present) and “Add descaler, Press OK”;
6. Empty the water tank (A16) completely and remove the water softener filter (C4), if present. Empty the drip tray (A12) (fig. 27) and grounds container (A10), then put them back in the appliance;
7. Pour the descaler (C3) into the tank up to level A (corresponding to a 3,38 fl.oz/100 ml pack) marked on the inner surface of the tank (fig. 40), then add a litre of water up to level B (fig. 40) and put the water tank back in the appliance;
8. Place an empty container with a minimum capacity of 67.63 fl.oz/ 2.0 litres under the coffee spouts (A7) and hot water spout (C6) (fig. 41);

⚠️ Important! Danger of burns
Hot water containing acid flows out of the coffee spouts and hot water spout. Take care to avoid contact with splashes of this solution.
9. Press the OK button to confirm that you have added the descaler solution. The message “Descaling underway” is displayed and the descaling procedure begins. The descaler
liquid comes out of the coffee spouts and hot water spout and a series of rinses and pauses is performed to remove limescale deposits from inside the machine;

After about 25 minutes, descaling stops and the messages “RINSING” and “FILL TANK” alternate on the display;

10. The coffee maker is now ready for rinsing through with clean water. Empty the container used to collect the descaler solution. Extract the water tank, empty, rinse under running water, fill with fresh water up to the MAX level and put back in the appliance: “RINSING, Press OK” is displayed;

11. Place the container used to collect the descaler solution empty under the coffee spouts and hot water spout (fig. 41);

12. Press the OK button to start rinsing. Hot water is delivered first from the coffee spouts to continue and end with the hot water spout. The message “RINSING Please wait” appears on the display;

13. When the water tank is empty, the messages “RINSING”, “FILL TANK” and “INSERT FILTER” (if previously removed) alternate on the display. Empty the container used to collect the rinsing water;

14. Remove the water tank, replace the water softener filter (if previously removed), fill the tank up to the MAX level with fresh water and insert it in the appliance. “RINSING Press OK” will appear on the display;

15. Place the container used to collect the rinsing water empty under the hot water spout;

16. Press the OK button to resume rinsing. Rinsing begins again from the hot water spout only and the message “RINSING Please wait” is displayed;

17. When it finishes, the message “Rinsing complete, Press OK” is displayed;

18. Press the OK button. The message “FILL TANK” is displayed;

19. Empty the drip tray, remove and top up the water tank with fresh water to the MAX level and put back in the machine.

Descaling is complete.

Please note!
- If the descaling cycle is not completed correctly (e.g. no electricity) we recommend repeating the cycle;
- After descaling, it is normal for the grounds container (A10) to contain water.

13. SETTING WATER HARDNESS

The DESCALE message is displayed after a period of time established according to water hardness.

The machine is set by default for a hardness value of 4. The machine can also be programmed according to the hardness of the mains water in the various regions so that the machine needs to be descaled less often.

13.1 Measuring water hardness
1. Remove the “TOTAL HARDNESS TEST” indicator paper (C1) from its pack (attached to the English instructions).
2. Immerse the paper completely in a glass of water for one second.
3. Remove the paper from the water and shake lightly. After about a minute, 1, 2, 3, or 4 red squares form, depending on the hardness of the water. Each square corresponds to one level.

13.2 Setting water hardness
1. Press the MENU/ESC button (B2) to enter the menu;
2. Press < (B9) or > (B10) (fig. 6) and select “Water hardness”;
3. Confirm the selection by pressing the OK button (B3-fig. 7);
4. Press < or > repeatedly to set the level as measured by the indicator paper (C1) (see previous section);
5. Press the OK button to confirm the setting.
6. Press the MENU/ESC button to exit the menu.

The machine is now reprogrammed with the new water hardness setting.

14. WATER SOFTENER FILTER

Certain models are fitted with a water softener filter (C4). If this is not the case with your model, you are recommended to purchase one from De’Longhi Customer Services.

To use the filter correctly, follow the instructions below.
14.1 Installing the filter

1. Remove the filter (C4) from the packaging.
2. Turn the date indicator disk (see fig. 42) until the next two months of use are displayed.

ℹ️ Please note
The filter lasts about two months if the appliance is used normally. If the coffee machine is left unused with the filter installed, it will last a maximum of three weeks.
3. To activate the filter, run tap water through the hole in the filter as shown in the figure until water comes out of the openings at the side for more than a minute (fig. 43).
4. Extract the tank (A16) from the appliance and fill with water.
5. Insert the filter in the water tank and immerse it completely for about ten seconds, sloping it and pressing it lightly to enable the air bubbles to escape (fig. 44).
6. Insert the filter in the filter housing (A17 - fig. 45A) and press as far as it will go.
7. Close the tank with the lid (A18 - fig. 45B), then replace the tank in the machine.

When you install the filter, you must notify the appliance of its presence.

8. Press the MENU/ESC button (B2) to enter the menu;
9. Press < (B9) or > (B10) (fig. 6) until “Install filter” appears on the display (B4);
10. Press the OK button (B3) (fig. 7);
11. “Enable?” is displayed;
12. Press the OK button to confirm the selection. “HOT WATER Press OK” is displayed;
13. Position a container under the hot water spout (C6) (min. capacity: 17 fl. oz/500 ml);
14. Press the OK button to confirm the selection. The appliance begins hot water delivery and the message “Please wait” is displayed;
15. After the flow of hot water stops, the appliance automatically resets to “Ready for coffee” status.
The filter is now active and you can use the coffee machine.

14.2 Replacing the filter

When “REPLACE FILTER” appears on the display (B4), after two months (see date indicator) or when the appliance has not been used for 3 weeks, you should replace the filter:
1. Extract the tank (A16) and exhausted filter (C4);
2. Take the new filter out of its packet and proceed as illustrated in points 2, 3, 4, 5, 6 and 7 in the previous section;
3. Position a container under the hot water spout (C6) (min. capacity: 17 fl. oz/500 ml);
4. Press the MENU/ESC button (B2) to enter the menu;
5. Press < (B9) or > (B10) (fig. 6) until “Replace filter” appears on the display;
6. Press the OK button (B3 - fig. 7);
7. The message “Confirm?” is now displayed;
8. Press the OK button to confirm the selection;
9. “HOT WATER Press OK” is displayed;
10. Press the OK button to confirm the selection. The appliance begins hot water delivery and the message “Please wait” is displayed;
11. After the flow of hot water stops, the appliance automatically resets to “Ready for coffee” status.
The new filter is now active and you can use the coffee machine.

14.3 Removing the filter

If you want to use the appliance without the filter (C4), you must remove it and notify the appliance of its removal. Proceed as follows:
1. Remove the tank (A16), remove the filter and put the tank back in the appliance;
2. Press the MENU/ESC button (B2) to enter the menu;
3. Press < (B9) or > (B10) (fig. 6) until “Install filter, Enabled” appears on the display (B4);
4. Press the OK button (B3 - fig. 7);
5. “Disable?” is displayed;
6. Press the **OK** button to confirm and the **MENU/ESC** button to exit the menu.
