1. INTRODUCTION
Thank you for choosing this bean to cup espresso and cappuccino machine.
Take a few minutes to read this Instruction for Use. This will avoid all risks and damage to the appliance.

1.1 Letters in brackets
The letters in brackets refer to the legend in the description of the appliance on pages 2-3.

1.2 Troubleshooting and repairs
In the event of problems, first try and resolve them by reading the information given in sections “21. Displayed messages” and “22. Troubleshooting”.
If this does not resolve the problem or you require further information, you should consult customer services by calling the number given on the annexed “Customer Service” sheet.
If your country is not among those listed on the sheet, call the number given in the guarantee. If repairs are required, contact De'Longhi customer services only. The addresses are given in the guarantee certificate provided with the machine.

1.3 Download the App!
Download the App then follow the instructions in the App to create your account.
A number of functions can be controlled remotely using the De'Longhi Coffee Link App.
In the App, you can also find information, tips and curious facts about the world of coffee, together with information on your machine at your fingertips.

This symbol highlights the functions you can control or consult using the App.
You can also create new beverages and save them in your appliance.

Please note:
• To access the functions from the App, enable connectivity from the appliance’s settings menu (see “6.3 Connectivity”).
• Check compatible devices on "compatibledevices.delonghi.com".

2. DESCRIPTION

2.1 Description of the appliance (page 2 - A)
A1. Cup shelf
A2. Pre-ground coffee funnel lid
A3. Pre-ground coffee funnel (removable)
A4. Pre-ground coffee measure compartment
A5. Beans container lid
A6. Beans container
A7. Main switch (ON/OFF)
A8. Power cord connector socket
A9. Button: to turn the appliance on and off (standby)
A10. Infuser door
A11. Removable infuser
A12. Milk container and descaling spout connector door
A13. Milk container and descaling spout connector
A14. Coffee/hot water spouts (adjustable height)
A15. Central outlet cover
A16. Top coffee spout
A17. Bottom coffee spout
A18. Condensate tray
A19. Water tank lid
A20. Water tank
A21. Cup tray
A22. Tray grille
A23. Drip tray water level indicator
A24. Drip tray
A25. Coffee grounds container
A26. Coffee grounds container support

2.2 Description of the homepage (main screen) (page 3 - B)
B1. Bean Adapt Technology (enable from App): see “7.5 Bean Adapt Technology & Espresso SOUL”
B2. Customisable profiles (see “15. Selecting your personal profile”)
B3. To display and customise the beverage settings
B4. Directly selectable beverages
B5. Display
B6. Appliance settings menu

Maintenance required lights
B7. Descaling required light
B8. Milk container cleaning required
B9. Filter exhausted light

2.3 Description of the accessories (page 3 - C)
C1. "Total Hardness Test” indicator paper (attached to the Quick Guide)
C2. Pre-ground coffee measure (in the compartment (A4))

Accessories in the Starter Set:
C3. Descaler
C4. Water softener filter (*certain models only)
C5. Cleaning brush
C6. Power cord
C7. Descaling spout *(keep the spout safely after each use)*

**Accessories with certain models only:**
C8. Coffee pot (*certain models only)
C9. Travel mug (*certain models only)

### 2.4 Description of the milk container” (page 3 - D)

D1. Milk container lid
D2. Milk refill lid
D3. Froth adjustment/Clean dial
D4. Dial seat
D5. Milk container connector (removable for cleaning)
D6. Milk spout seat
D7. Milk spout (adjustable height)
D8. Milk spout extension (adjustable)
D9. Milk intake tube
D10. Milk container (*thermal in certain models)

### 3. SETTING UP THE APPLIANCE 🔄

**Please note:**
- Possible traces of coffee in the mill are the result of settings tests performed on the appliance before sale, proof of the meticulous care and attention we invest in our products.
- The first time you use the appliance, all removable accessories (milk container (D), travel mug (C9), coffee pot (C8), water tank (A20)) destined to come into contact with water or milk should be rinsed with hot water. We recommend washing the milk container in a dishwasher.
- You should customise water hardness as soon as possible following the instructions in section “18. Setting water hardness 🔄”.

1. Plug the power cord connector (C6) into the socket (A8) at the back of the appliance and connect the appliance to the mains power supply (fig. 1). Make sure the main switch (A7) at the back of the appliance is pressed (fig. 2);
2. Press the flag corresponding to the desired language.
Then follow the instructions which appear on the appliance display (B5):

3. Remove the water tank (A20) (fig. 3) and fill to the MAX line (marked on the inside of the tank) with fresh water (fig. 4);
4. Then put the tank back (fig. 5) and confirm by pressing "Next";
5. Fill the beans container (A6) (fig. 6), then confirm by pressing "Next".
6. Insert the descaling spout (C7) (in the Starter Set) on the milk container connector (A13) (fig. 7) and place a container with a minimum capacity of 100 ml under the coffee spouts (A14) and descaling spout (fig. 8);
7. Press "OK" to fill the water circuit: the appliance delivers water from the spouts (fig. 9);

8. At the end of delivery, the appliance proceeds with heating by performing a rinse cycle, delivering hot water from the coffee spouts (A14). When at temperature, the appliance proposes an introductory video explaining the home page (B).

Please note:
- The first time you use the appliance, you need to make 4-5 cappuccinos before the results in the cup will be satisfactory.
- The first time you use the machine, the water circuit is empty and the appliance could be very noisy. The noise becomes less as the circuit fills.
- After turning the appliance on for the first time, remove the spout (C7) and store safely. You will need it to perform certain maintenance operations on the appliance.

4. TURNING THE MACHINE ON

Please note:
- Before turning the appliance on, make sure the main switch (A7) is pressed (fig. 2).
- Each time the appliance is turned on, it performs an automatic preheat and rinse cycle which cannot be interrupted. The appliance is ready for use only after completion of this cycle.

1. To turn the appliance on, press the button (A9) (fig. 10): the appliance comes on
2. When at temperature, the appliance performs a rinse cycle delivering hot water from the coffee spouts (A14). As well as heating the boiler, this also heats the internal circuits by circulating hot water.

5. TURNING THE APPLIANCE OFF

Whenever the coffee machine is turned off after being used to make coffee, it performs an automatic rinse cycle.

1. To turn the appliance off, press the button (A9) (fig. 10).
2. If envisaged, the appliance performs a rinse cycle, delivering hot water from the coffee spouts (A14), then goes off (stand-by).

Please note:
- If you will not be using the appliance for some time, unplug from the mains socket:
- Release the main switch (A7) at the back of the appliance (fig. 2).

Important!
Never press the main switch while the appliance is on.

6. MENU SETTINGS

6.1 Rinsing

Use this function to deliver hot water from the coffee/hot water spouts (A14) (and, if inserted, the descaling spout (C7)), to clean and heat the appliance’s internal circuit.

Place a container with a minimum capacity of 100ml under the spouts (fig. 8).

To enable the function, proceed as follows:
1. Press the settings menu (B6);
2. Select “Rinsing”;
3. Press “OK” to start delivery: after a few seconds, hot water is delivered to clean and heat the appliance’s internal circuit (fig. 9);
4. To stop rinsing, press “Cancel” or wait for rinsing to stop automatically.

Please note:
- If the appliance is not used for more than 3-4 days, when you turn it on again, we strongly recommend performing 2-3 rinses before use;
- After cleaning, it is normal for the grounds container (A25) to contain water.

6.2 Descaling

For instructions on descaling, see section “17. Descaling”.

6.3 Connectivity

Use this function to enable or disable connectivity. Proceed as follows:
1. Press the settings menu (B6);
2. Select “Connectivity”;
3. Press “Next”;
4. Enable the Wi-Fi connection and remote control (via the De’Longhi Coffee Link App);
5. The appliance PIN, needed to connect by App, is displayed on the screen;
6. Press “<” to save the new selection and go back to the homepage (B).
In the settings menu (B6), the symbol indicating the connection status alternates with the other symbols (e.g. descaling, etc.)

<table>
<thead>
<tr>
<th>Symbol on homepage</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>📡</td>
<td>The appliance is connected</td>
</tr>
<tr>
<td>🌓</td>
<td>The appliance is connected to the home Wi-Fi, but there is no network, or the cloud cannot be reached</td>
</tr>
<tr>
<td>--</td>
<td>Connection disabled. To enable, enter the &quot;Settings&quot; menu&quot; (B6)</td>
</tr>
</tbody>
</table>

**Please note:**
If remote connection is off, a number of the App’s functions will not be available (e.g. beverage delivery).

If you change name of password of the wifi or if you connect to a new wifi network, you need to reset connectivity as follows:
1. proceed as explained from step 1 to 3;
2. press “Reset”;
3. press “Ok” to confirm the deleting of the network settings;
4. reconnect with the App selecting the new settings.

### 6.4 Adjust mill

We suggest you access [Bean Adapt Technology in the Coffee Link App to adjust this parameter to an appropriate setting for the coffee beans used](#).
If, on the other hand, you want to adjust the parameter from the settings menu, proceed as follows:
1. Press the settings menu (B6);
2. Select “Adjust mill”. A tutorial appears on the display (B5) with suggestions on the grinding level; if you want to skip this presentation, press "Skip" or "Next" to continue with the tutorial;
3. Follow the previous instructions in the tutorial to select the required grinding fineness by pressing directly on one of the selectable numbers in the highlighted interval;
4. Press "OK" to confirm the selection: "The result in the cup will be perceived after about 5 deliveries";
5. Press "OK" to confirm and go back to the homepage (B).

**Please note:**
- After carrying out the above procedure, we recommend delivering at least 5 coffees before adjusting again. If coffee delivery is still not correct, repeat the procedure.
- You cannot adjust more than one grinding level at a time unless at least two coffee-based beverages have been made.
- Press “Default” to reset the default values of the coffee mill (indicated by a star).

### 6.5 Coffee temperature

To change the temperature of the water used to make the coffee, proceed as follows:
1. Press the settings menu (B6);
2. Select “Coffee temperature”;
3. Access [Bean Adapt Technology from the App to get the best from this function](#). If, on the other hand, you want to proceed from the settings menu, press "OK";
4. Select the required temperature from those proposed;
5. Press “<” to save the new selection and go back to the homepage (B).

**Please note:**
- A different temperature can be set for each profile (see section “14. Guided beverage customisation (My)”).
- Varying the temperature has most effect for long beverages.

### 6.6 Selecting the language

To modify the language of the display (B5), proceed as follows:
1. Press the settings menu (B6);
2. Select “Select language”;
3. Press the flag corresponding to the language you want to set (press “Next” or “Back” to display all the languages available). The display is immediately updated with the selected language;
4. Press “<” to save the new selection and go back to the homepage (B).

### 6.7 Edit profile

You can use this function to modify the image and colour of the icon for each profile. To customise the icon, proceed as follows:
1. Press the settings menu (B6);
2. Select “Edit profile”;
3. Select the profile and press “Next”;
4. Customise as you wish, then press "OK" to continue.
5. Press “<” to save the new selection and go back to the homepage (B).

**Please note:**
Depending on the model, 3 or 5 profiles can be customised.

### 6.8 Auto-off

Auto-off can be set so that the appliance goes off after 15 or 30 minutes, or 1, 2 or 3 hours.
To programme Auto-off, proceed as follows:
1. Press the settings menu (B6);
2. Select "Auto-Off";
3. Select the desired time interval (15 or 30 minutes, or 1, 2 or 3 hours).
4. Press "<-" to save the new selection and go back to the homepage (B).

6.9 General
1. Press the settings menu (B6);
2. Select "General";
Here you can enable or disable the following functions with a simple touch:
- "Beep": when enabled, the appliance beeps whenever an operation is performed.
- "Energy saving": use this function to enable or disable energy saving. When enabled, the function reduces energy consumption in compliance with European regulations. When enabled, the symbol appears on the icon in the settings menu (B6).

6.10 Water filter
For instructions on the filter (C7), see section “19. Water softener filter”.

6.11 Water hardness
For instructions on setting water hardness, see section “18. Setting water hardness”.

6.12 Default values
This resets all menu settings and user customisation back to the default values (with the exception of the language, which remains as set, and the statistics).
Proceed as follows:
1. Press the settings menu (B6);
2. Select "Default values";
   - To reset the appliance to the default values, press "OK";
   - otherwise to reset the individual profile, press the arrow to pass to the next screen, select the profile to reset and press "OK";
3. Press "OK" again to confirm the reset to default values;
4. Press "OK" to exit the menu and go back to the homepage (B).

Please note:
When the appliance (not the individual profile) has been reset to the default values, the machine proposes the introductory video again.

6.13 Emptying the circuit
To avoid the water in the circuit freezing if the appliance is to be left idle for a long period of time, or before taking it to customer services, we recommend emptying the water circuit.
Proceed as follows:
1. Press the settings menu (B6);
2. Select "Empty water circuit";
3. Press "OK" to start the guided procedure;
4. Empty the grounds container (A25) and drip tray (A24) (fig. 11), then press "Next";
5. Insert the spout (C7) on the milk container connector (A13) (fig. 7);
6. Position a 0.5 litre container under the spout (fig. 8). Press "OK";
7. The appliance performs a rinse cycle with hot water from the spouts;
8. At the end of rinsing, remove the water tank (A20) (fig. 12) and empty; if present, remove the water softener filter (C7) from the water tank and press "Next";
9. Put the empty water tank back in the appliance and press "OK";
10. Wait for the appliance to empty the circuit; (Important: hot water from the spouts!). As the water circuit empties, the appliance could become noisier. This is part of normal operation.
11. When the circuit is empty, extract and empty the drip tray, put back in the appliance and press "Next";
12. Press "OK". The appliance goes off (standby). The next time the appliance is turned on, follow the instructions in section “3. Setting up the appliance”.

6.14 Statistics
This displays statistics relating to the machine. To view the statistics, proceed as follows:
1. Press the settings menu (B6);
2. Select "Statistics". To display the information and scroll between screens, press "Next" or "Back".
3. Press "<-" to go back to the homepage (B).
7. MAKING COFFEE

7.1 Making coffee using coffee beans

*Important!*

Do not use green, caramelised or candied coffee beans as they could stick to the coffee mill and make it unusable.

1. Place 1 or 2 cups under the coffee spouts (A14);
2. Lower the spouts as near as possible to the cup (fig. 13). This makes a creamier coffee.
3. Select the coffee you want to make as described in the following paragraphs.

7.2 Your coffee at a touch

To deliver coffee-based beverages, press the image on the homepage (B) corresponding to the desired coffee (e.g. espresso, fig. 14). The appliance proceeds with preparation. The image of the selected beverage appears on the display (B5), together with a progress bar which gradually fills as the operation proceeds and a description of each individual phase (grinding, brewing coffee).

At the end of preparation, the message “Your beverage is ready!” appears on the display. The appliance is now ready to be used again.

7.3 Customising the beverages

To make coffee-based beverages with customised parameters, proceed as follows:

1. Press (B3) at the bottom of the image corresponding to the desired coffee (e.g. espresso, fig. 15). The parameters that can be customised according to your tastes appear on the display (B5):

| Quantity | [Image]
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Aroma</td>
<td>[Image]</td>
</tr>
</tbody>
</table>

2. After setting the parameters, press “Start”. The appliance starts making the coffee and the image of the selected beverage appears on the display, together with a progress bar which gradually fills as the operation proceeds and a description of each individual phase (grinding, brewing coffee);
3. When delivery has ended, press “Save” to save the new settings, or “Cancel” to retain the previous parameters.

*Please note:*

If you save the new settings, they are memorised ONLY in the selected profile.
4. Press “OK” to go back to the homepage (B). The appliance is ready to be used again.

7.4 Making coffee using pre-ground coffee

*Important!*

- Never add pre-ground coffee when the machine is off or it could spread through the inside of the machine and dirty it. This could damage the machine.
- Never use more than 1 level measure (C2) as it could soil the inside of the coffee machine or block the funnel (A3).
- When using pre-ground coffee, only one cup can be made at a time.
- Making LONG coffee: halfway through preparation, when requested by the appliance, add one level measure of pre-ground coffee and press “OK”.
- You cannot make a DOPPIO+ coffee using pre-ground coffee.

1. Press (B3) at the bottom of the image corresponding to the desired coffee (e.g. Espresso, fig. 15). The parameters that can be customised according to your tastes appear on the display (B5);
2. Select pre-ground coffee:

| Coffee type | [Image] |

3. Lift the pre-ground coffee funnel lid (A3), make sure the funnel (A3) is not blocked, then add one level measure (C2) of pre-ground coffee (fig. 16): press “OK”;
4. Select the coffee quantity and press "Start". The appliance starts making the coffee and the image of the selected beverage appears on the display, together with a progress bar which gradually fills as the operation proceeds and a description of each individual phase (grinding, brewing coffee).

7.5 Bean Adapt Technology & Espresso SOUL
A coffee expert at your fingertips to help you optimise coffee brewing and the result in your cup in just a few steps. The smart technology automatically adjust the machine according to the coffee beans used - from grinding fineness to brewing, each phase will be regulated to get the best results from the coffee bean.

Download the Coffee Link App to find out more. Once the settings have been saved in the "Bean Adapt Technology" section of the App, you can use the "Espresso SOUL" beverage on the homepage. To make espresso coffee, follow the instructions in section "7.2 Your coffee at a touch".

Please note:
You can modify the quantities in the “Espresso SOUL” recipe as described in section “7.3 Customising the beverages”.

7.6 General indications for making coffee-based beverages
- While the machine is making coffee, delivery can be interrupted at any moment by pressing "Stop" or "Cancel".
- As soon as delivery has ended, to increase the quantity of coffee, just press "Extra". When the required quantity is reached, press "Stop".
- Various alarm messages may appear on the display (B5) while using the appliance (“FILL TANK WITH FRESH WATER”, "EMPTY GROUNDS CONTAINER", "EMPTY DRIP TRAY" etc.). Their meaning is explained in section “21. Displayed messages.”.
- If the coffee emerges drop-by-drop, too weak and not creamy enough, or too cold, read the tips in sections “6.4 Adjust mill” and "22. Troubleshooting.".
- If "Energy Saving" mode is active, you may have to wait a few seconds before the first coffee is delivered.

7.7 Tips for a hotter coffee
For hotter coffee, proceed as follows:
- perform a rinse cycle by selecting "Rinsing" in the settings menu (B6) (section “6.1 Rinsing”);
- warm the cups with hot water using the hot water function (see section “13. Delivering hot water”);
- increase the coffee temperature (section “6.5 Coffee temperature”).

8. COFFEE POT
Based on espresso coffee, this beverage is light and balanced, with a fine layer of froth, ideal to share in company.

Optional accessory in certain models:

<table>
<thead>
<tr>
<th>Taste per single cup</th>
<th>Quantity in cup*</th>
<th>Number of cups</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extra mild</td>
<td>Extra-large cup (≈ 250 ml)</td>
<td>from 1 to 3</td>
</tr>
<tr>
<td>Mild</td>
<td>Large cup (≈ 190 ml)</td>
<td>from 1 to 4</td>
</tr>
<tr>
<td>Medium</td>
<td>Medium cup (≈ 150 ml)</td>
<td>from 1 to 5</td>
</tr>
<tr>
<td>Strong</td>
<td>Small cup (≈ 125 ml)</td>
<td>from 1 to 6</td>
</tr>
</tbody>
</table>

* The quantities indicated are approximate and may vary according to the type of coffee.

3. Press "Next" to move on to the next step;
3. Fill the tank (A20) with water and fill the beans container (A6) (fig. 17). Once you have made sure there is sufficient water and coffee for the beverages you want to prepare, press "Next";
4. Place the coffee pot (C8) under the spouts (fig. 18). Press "OK";
5. The appliance proceeds with delivery and the image of the selected beverage appears on the display (B5), together with a progress bar which gradually fills as the operation proceeds and a description of each individual phase (grinding, brewing coffee).

Please note:
"Cancel "or Stop": press to stop preparation completely and go back to the homepage.
6. When delivery has ended, press "Save" to save the new settings, or "Cancel" to retain the previous parameters.
7. Press "OK" to go back to the homepage (B).
The appliance is ready to be used again.

Please note:
If you save the new settings, they are memorised ONLY in the selected profile.

SAFETY WARNING:
After making a pot of coffee, leave the appliance to cool for 5 minutes before making another beverage. Risk of overheating!

8.1 Cleaning the coffee pot
After each use, you should clean the coffee pot with hot water and mild washing up liquid. Rinse thoroughly with hot water to eliminate all detergent residues.

9. OVER ICE (ECAM61X.7Y only)
To make the beverage, proceed as follows:
1. On the homepage (B), press the image corresponding to over ice:
2. Select the parameters to be customised according to your tastes by pressing "Next" after each selection:

<table>
<thead>
<tr>
<th>Aroma</th>
<th>Quantity</th>
</tr>
</thead>
</table>

3. Place the ice cubes in the glass (suggested quantity: 6 cubes);
4. Place the glass under the coffee spouts (A14) (fig. 19) and press "OK". The appliance starts making the coffee and the image of the selected beverage appears on the display, together with a progress bar which gradually fills as the operation proceeds and a description of each individual phase (grinding, brewing coffee);

Please note:
• "Cancel "or Stop": press to stop preparation completely and go back to the homepage.
• As soon as delivery has ended, to increase the quantity of coffee, just press "Extra". When the required quantity is reached, press "Stop".
6. When delivery has ended, press "Save" to save the new settings, or "Cancel" to retain the previous parameters.

Please note:
If you save the new settings, they are memorised ONLY in the selected profile.
7. Press "OK" to go back to the homepage (B).
The appliance is ready to be used again.

10. MAKING MILK-BASED BEVERAGES

Please note:
To avoid milk with poor froth or large bubbles, always clean the milk container (D) as described in sections “10.5 Cleaning the milk container after use” and “16.10 Cleaning the milk container (D)”.

10.1 Filling and attaching the milk container
1. Lift the lid (D1) (fig.20);
2. Fill the milk container (D10) with a sufficient quantity of milk, not exceeding the MAX level marked on the container (fig. 21). Each mark on the container corresponds to about 100 ml of milk;
3. Make sure the milk intake tube (D9) is correctly inserted on the bottom of the milk container lid (fig. 22);
4. Put the lid back on the milk container;
5. Attach the milk container (D) to the connection nozzles (A13) and push as far as it will go (fig. 23). The machine emits a beep (if the beep function is enabled);

6. Place a sufficiently large cup under the coffee spouts (A14) and milk spout (D7) (fig. 24). To lengthen the milk spout, adjust the extension (D8);
7. Select the desired beverage as described in the following paragraphs.

**Please note:**
- The milk container lid incorporates a refill lid (D2) to top up the milk (fig. 25). If during preparation you notice that the level of the milk is low, add milk through the refill lid without extracting the container, then complete preparation of the beverage.
- For a denser more even froth, you must use skimmed or partially skimmed milk at refrigerator temperature (about 5°C).
- **ECAM61X.7Y:** When using milk at the ideal temperature (about 5°C), the thermal casing guarantees the efficiency of the MilkCream system for about 30 minutes outside the refrigerator.
- If "Energy Saving" mode is enabled (see section "6.9 General"), you may have to wait a few seconds before the beverage is delivered.

- The quality of the froth will vary depending on:
  - type of milk or vegetable beverage;
  - brand used;
  - ingredients and nutritional value.

### 10.2 Adjusting the amount of froth

Turn the froth adjustment dial (D3) (fig. 26) to adjust the amount of froth on the milk delivered while making cappuccinos and milk-based coffees.

<table>
<thead>
<tr>
<th>Dial position</th>
<th>Description</th>
<th>Recommended for…</th>
</tr>
</thead>
<tbody>
<tr>
<td>-</td>
<td>No froth</td>
<td>HOT MILK (not frothed) / CAFFELATTE</td>
</tr>
<tr>
<td>-</td>
<td>Min. froth</td>
<td>CORTADO / FLAT WHITE</td>
</tr>
<tr>

<td>Max. froth</td>
<td>CAPPUCINO/ CAPPUCINO NO+ / CAPPUCINO MIX/ ESPRESSO MACCHIATO/ LATTE MACCHIATO / LATTE CALDO (frothed)</td>
</tr>
</tbody>
</table>

### 10.3 Your milk-based beverage at a touch

To deliver milk-based beverages, on the homepage (B), press the image corresponding to the desired beverage. The appliance proceeds with preparation and the image of the selected beverage appears on the display (B5), together with a progress bar which gradually fills as the operation proceeds and a description of each individual phase (grinding, brewing coffee, milk delivery, etc.).

At the end of preparation, the message "Your beverage is ready!" appears on the display. The appliance is now ready to be used again.

**Please note:**
As soon as delivery has ended, to increase the quantity of coffee, just press "Extra". When the required quantity is reached, press "Stop".
10.4 Customising the beverages
To deliver a customised milk-based beverage, proceed as follows:
1. Press \( \text{B3} \) at the bottom of the image corresponding to the desired beverage. The parameters that can be customised according to your tastes appear on the display (B5):

<table>
<thead>
<tr>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aroma</td>
</tr>
<tr>
<td>Coffee type</td>
</tr>
</tbody>
</table>

2. After setting the parameters, press "Start";
3. The appliance proceeds with preparation and the image of the selected beverage appears on the display, together with a progress bar which gradually fills as the operation proceeds and a description of each individual phase (grinding, milk delivery, brewing coffee, etc.).
4. When delivery has ended, press "Save" to save the settings, or "Cancel" to retain the previous parameters.

**Please note:**
If you save the new settings, they are memorised ONLY in the selected profile.
5. Press "OK" to go back to the homepage (B). The appliance is ready to be used again.

10.5 Cleaning the milk container after use
Each time you make a milk-based beverage, a request to clean the milk frother appears on the display (B5). To start cleaning, proceed as follows:
1. Leave the milk container (D) in the machine (you do not need to empty it);
2. Place a cup or other recipient under the frothed milk spout (D7) (fig. 27);
3. Turn the froth adjustment dial (D3) to "Clean" (fig. 28). Hot water and steam are delivered from the milk spout (fig. 29). Cleaning stops automatically;
4. Turn the dial back to one of the froth selections;
5. Remove the milk container and place in the refrigerator.

**Please note:**
- To prepare a number of cappuccinos and milk based coffees, clean the milk container after you have prepared the last beverage only. To proceed with making the next beverages, when the "Clean" message is displayed, press "Cancel".
- If you do not clean the milk container, the \( \text{B8} \) symbol appears on the display to remind you that cleaning is required.
- The milk container can be kept in the refrigerator.
- In some cases, to clean you must wait for the appliance to heat up.
- To ensure correct cleaning, wait for the CLEAN function to end. You can, however, interrupt cleaning of the milk container by pressing "Stop".

11. MUG TO GO (ECAM61X.7Y only)
The Mug to Go function is perfect for all those wanting to create a customised beverage to take with them. Choose the ingredients (coffee only, coffee with milk or coffee with hot water) and the delivery order, then customise the quantity.
To make the beverage, proceed as follows:
1. Remove the lid from the travel mug (C9);
2. Raise the coffee spouts (A14) and place the travel mug container underneath (fig. 30);
3. On the homepage (B), press the image corresponding to the Mug to Go function;
   If the beverage has already been saved, the appliance proceeds with preparation.
If you are making the beverage for the first time, proceed as follows:
4. Select up to 2 ingredients in the required order of delivery, then press "Next";
5. Select the preferences for the selected ingredients, then press "Next";
6. Press "OK" to start preparation;
7. When the required quantity of the ingredient being delivered is reached, press "Stop";
8. When delivery has ended, press "Save" to save the recipe, or "Cancel" if you do not want to save it
9. Press "OK" to go back to the homepage.

The appliance is ready to be used again.

**Table of quantities programmable for each single ingredient** (make sure the total quantity of the 2 ingredients does not exceed the capacity of the travel mug)

<table>
<thead>
<tr>
<th>Ingredient</th>
<th>Minimum quantity</th>
<th>Maximum quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coffee</td>
<td>40 ml</td>
<td>240 ml</td>
</tr>
<tr>
<td>Milk</td>
<td>50 ml</td>
<td>470 ml</td>
</tr>
<tr>
<td>Water</td>
<td>50 ml</td>
<td>260 ml</td>
</tr>
</tbody>
</table>

**Please note:**
- If you save the new settings, they are memorised ONLY in the selected profile.
- For best performance, heat the mug with hot water.
- You should only use the travel mug for the beverages present in the machine.
- **Recipes using the milk container (D):** at the end of preparation, clean the milk container (see section “10.5 Cleaning the milk container after use”), then place in the refrigerator.
- To use a travel mug other than the one supplied, make sure it is no taller than 14 cm.

**Important**
- Do not use for baby milk preparations.
- You should use the contents within a maximum of 2 hours. After that time, empty and clean as described in the following section.

**11.1 Cleaning the travel mug after use**
For hygiene reasons, the travel mug (C9) should always be cleaned after use.
Proceed as follows:
1. Open the travel mug and rinse the container and lid with hot drinking water (40°C).
2. Remove visible dirt with a sponge.
3. Immerse all the components in hot water at 40°C with mild/neutral washing-up liquid for at least 30 minutes, then rinse thoroughly with water at 40°C. Do not use scented detergents.
4. Clean the inside of the container with mild/neutral washing-up liquid and rinse with hot drinking water at 40°C. Do not use abrasive materials as these could damage the surface of the container.
5. Dry all the components with a clean, dry cloth or absorbent paper, then reassemble.
6. Each week, wash the lid in a dishwasher. The travel mug container is not dishwasher safe.

**12. TEA FUNCTION**

To make tea, proceed as follows:
1. Place the teabag in the cup and position it under the spout (A14) (fig. 31);
2. On the homepage (B), press the image corresponding to the tea function;
3. Adjust the parameters that can be customised according to your tastes:
   
   ![Image of tea settings]

   **Quantity**

   **Temperature**
   A different tea (white, green, oolong or black) appears with each water temperature

4. Press "Start" to begin delivery: the appliance proceeds with preparation and the image of the beverage appears on the display (B5) together with a progress bar which gradually fills as the operation proceeds and a description of the phase (water delivery);
5. When delivery has ended, press "Save" to save the settings, or "Cancel" to retain the previous parameters;
6. Press "OK" to go back to the homepage.

The appliance is now ready to be used again.

**Please note:**
- If you save the new settings, they are memorised ONLY in the selected profile.
- If "Energy Saving" mode is active, you may have to wait a few seconds before the hot water is delivered.
- To stop delivery manually, press "Stop" or "Cancel".
- As soon as delivery has ended, to increase the quantity of water in the cup, just press "Extra". When the required quantity is reached, press "Stop".
13. DELIVERING HOT WATER

To deliver hot water, proceed as follows:
1. Place a cup under the spout (A14).
2. Select the function as described in the following paragraphs.

13.1 Your beverage at a touch

On the homepage (B), press the image corresponding to hot water. The appliance proceeds with preparation and the image of the beverage appears on the display (B5) together with a progress bar which gradually fills as the operation proceeds and a description of the phase (water delivery). At the end of preparation, the message "Your beverage is ready!" appears on the display. The appliance is now ready to be used again.

**Please note:**
As soon as delivery has ended, to increase the quantity of water in the cup, just press "Extra". When the required quantity is reached, press "Stop".

13.2 Customising the beverages

To deliver the desired quantity of hot water, proceed as follows:
1. Press (B3) at the bottom of the image corresponding to hot water: the quantity to be customised according to your tastes appears on the display (B5):

<table>
<thead>
<tr>
<th>&quot;Quantity&quot;</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Progress Bar Image]</td>
</tr>
</tbody>
</table>

2. After selecting the quantity, press "Start": The appliance proceeds with preparation and the image of the beverage appears on the display together with a progress bar which gradually fills as the operation proceeds and a description of the phase (water delivery).
3. When delivery has ended, press "Save" to save the settings, or "Cancel" to retain the previous parameters.
4. Press "OK" to go back to the homepage.

The appliance is now ready to be used again.

**Please note:**
- If "Energy Saving" mode is active, you may have to wait a few seconds before the hot water is delivered.
- To interrupt delivery of hot water manually, press "Stop" and "Cancel".
- As soon as delivery has ended, to increase the quantity of coffee, just press "Extra". When the required quantity is reached, press "Stop".

14. GUIDED BEVERAGE CUSTOMISATION (MY)

You can use this function to customise all beverages with the MY symbol at the bottom of the image in beverage settings (on the homepage (B), press (B3) at the bottom of the image corresponding to the required beverage). To customise, proceed as follows:
1. Make sure the profile (B2) for which you want to customise the beverage is active;
2. Press (B3) at the bottom of the image corresponding to the desired beverage;
3. Press (B3) at the bottom of the image corresponding to the beverage;
4. Press "OK" to follow the guided procedure;
5. Select your preference and press "Next" to move on to the next step (or "Back" to go back to the previous screen);
6. Press "OK" to begin delivery;
7. Preparation begins and the appliance displays the quantity customising screen in the form of a vertical bar (in the case of beverages with more than one ingredient, customise both ingredients).
8. When the quantity reaches the minimum amount you can set, "Stop" appears on the display (B5).
9. When the required quantity has been delivered into the cup, press "Stop".
10. If you are satisfied with the result in the cup, press "Save" to save the settings, or "Cancel" to retain the previous parameters.
11. Press "OK" to go back to the homepage.

The appliance goes back to the homepage.

**Please note:**
- If you save the new settings, they are memorised ONLY in the selected profile.
- When you customise a single beverage, the respective double version is also customised and the appliance displays the message "Settings saved on both double and single option";
- You can also customise the beverages by connecting with the DeLonghi Coffee Link App.
- Press "Cancel" to exit programming at any moment. The values will not be saved.
- When a beverage has been customised, "Reset" (under the image) and "my" (among the quantity selections) appear in the settings. Press "Reset" to reset the default values for the beverage.

<table>
<thead>
<tr>
<th>Beverage</th>
<th>Standard quantity</th>

<td>30-60 ml</td>
</tr>
<tr>
<td>2X ESPRESSO</td>
<td>40 ml + 40 ml</td>
<td>20-180 ml + 20-180 ml</td>
</tr>
</tbody>
</table>
15. SELECTING YOUR PERSONAL PROFILE

According to the model, you can memorise 3 or 5 different profiles, each associated with a different icon. The customised beverage settings are saved in each profile (see section “14. Guided beverage customisation (My)”). The order in which all the beverages are displayed is based on the frequency of selection.

To select a profile, proceed as follows:

1. From the homepage (B), press the profile currently in use (B2). A list of selectable profiles appears;
2. Then select the required profile.

Please note:
- After making your selection, the beverage settings bars will all appear in the same colour as the profile;
- You can rename your personal profile by connecting with the De'Longhi Coffee Link App;
- To customise the profile icon, see section “6.7 Edit profile”.

16. CLEANING

16.1 Cleaning the machine

The following parts of the machine must be cleaned regularly:
  - the appliance’s internal circuit;
  - coffee grounds container (A25);
  - drip tray (A24) and drip tray grille (A22);
  - water tank (A20);
  - coffee spouts (A14);
  - pre-ground coffee funnel (A3);
  - infuser (A11), accessible after opening the infuser door (A10);
  - milk container (D).

Important!
- Do not use solvents, abrasive detergents or alcohol to clean the coffee machine. With De’Longhi superautomatic coffee machines, no chemical products are required for cleaning purposes.
- The following components are dishwasher safe:
  - milk container (D)
  - grounds container (A25)
  - drip tray (A24)
  - drip tray grille (A22)
  - coffee spouts (A16) and (A17)
- Do not use metal objects to remove encrustations or coffee deposits as they could scratch metal or plastic surfaces.

16.2 Cleaning the internal circuit

If the appliance is not used for more than 3/4 days, before using it again, we strongly recommend switching it on and performing 2/3 rinse cycles by selecting the “Rinse” function (section “6.1 Rinsing”).

Please note:
After cleaning, it is normal for the grounds container (A25) to contain water.

16.3 Cleaning the coffee grounds container

When “Empty grounds container” appears on the display (B5), the grounds container must be emptied and cleaned. The appliance cannot be used to make coffee until you have cleaned the grounds container (A25). Even if not full, the empty grounds container message is displayed 72 hours after the first coffee has been prepared. For the 72 hours to be calculated correctly, the machine must never be turned off with the main switch (A7).

Important! Danger of burns
If you make a number of milk-based beverages one after the other, the metal cup tray (A21) becomes hot. Wait for it to cool down before touching it and handle it from the front only.
To clean (with the machine on):

1. Remove the drip tray (A24) and grounds container (A25) (fig. 32);
2. Empty the drip tray and grounds container and clean thoroughly to remove all residues left on the bottom. This can be done using the spatula on the brush (C5) provided.
3. Put the drip tray complete with grille and grounds container back in the appliance.

Important!
When removing the drip tray, the grounds container must be emptied, even if it contains few grounds. If this is not done,
when you make the next coffees, the grounds container will fill up more than expected and clog the machine.

16.4 Cleaning the drip tray and drip tray grille

Important!
The drip tray (A24) is fitted with a level indicator (A23) (red) showing the amount of water it contains (fig. 33). Before the indicator protrudes from the cup tray (A21), the drip tray must be emptied and cleaned, otherwise the water may overflow the edge and damage the appliance, the surface it rests on or the surrounding area. To remove the drip tray, proceed as follows:

1. Remove the drip tray and grounds container (A25) (fig. 32);
2. Check the condensate tray (red) and empty if necessary;
3. Remove the cup tray (A21), and drip tray grille (A22), then empty the drip tray and grounds container and wash all components.
4. Put the drip tray complete with grille and grounds container back in the appliance.

Important!
When removing the drip tray, the grounds container must be emptied, even if it contains few grounds. If this is not done, when you make the next coffees, the grounds container will fill up more than expected and clog the machine.

16.5 Cleaning the inside of the machine

Danger of electric shock!
Before cleaning internal parts, the machine must be turned off (see section “5. Turning the appliance off”) and unplugged from the mains power supply. Never immerse the machine in water.

1. Check regularly (about once a month) that the inside of the appliance (accessible after removing the drip tray (A24)) is not dirty. If necessary, remove coffee deposits with the brush (C5) supplied and a sponge.
2. Remove all residues with a vacuum cleaner (fig. 34).

16.6 Cleaning the water tank

Clean the water tank (A20) regularly, about once a month and whenever you replace the water softener filter (C7).

1. Remove the water tank (fig. 3), remove the water softener filter (if present) and rinse it with running water;
2. Empty the water tank and clean with a damp cloth and a little washing up liquid. Rinse thoroughly with water;
3. Put the filter back in the appliance (fig. 35), fill the tank with fresh water up to the MAX level (marked inside) (fig. 4), put the tank back (fig. 5);
4. (models with water softener filter only) Deliver 100ml of hot water to reactivate the filter.

Please note:
If the appliance is not used for more than 3-4 days, you should clean the tank as described above.

16.7 Cleaning the coffee spouts

Clean the coffee spouts (A16) and (A17) when requested by the appliance (about once a month) as described below.

Please note:
To clean later, press “Cancel”. The next time the appliance is turned on, the message is displayed again.

1. Remove the central outlet cover (A15) by pulling outwards, then remove the coffee spouts downwards (fig. 36). Press “Next”;
2. Separate the two spouts (A16) and (A17) (fig. 37);
3. Rinse the spouts with running water (fig. 38). We recommend washing in a dishwasher. Alternatively, wash thoroughly with warm water and mild washing-up liquid;
4. Clean the seat of the removable spouts with a sponge (fig. 39);
5. Reassemble the spouts, then attach them to the central outlet. Make sure the word "INSERT" is at the top and is visible when the spouts have been inserted;  
6. Replace the central outlet cover.  
7. Press "OK" to confirm cleaning.

**16.8 Cleaning the pre-ground coffee funnel**  
Clean the pre-ground coffee funnel (A3) regularly (about once a month) with a damp cloth. Proceed as follows:  
1. Open the lid (A2) (fig. 16);  
2. Extract the funnel (fig. 40) and clean with the brush provided (C5);  
3. If necessary, clean the funnel with hot water and washing up liquid or in a dishwasher;  
4. Put the funnel back in the appliance;  
5. Close the lid.

**16.9 Cleaning the infuser**  
The infuser (A11) must be cleaned at least once a month.  
**Important!**  
The infuser cannot be removed when the machine is on.  
1. Make sure the machine is correctly turned off (see section “5. Turning the appliance off”);  
2. Remove the water tank (A20) (fig. 4);  
3. Open the infuser door (A10) (fig. 41) on the right side of the appliance;  
4. Press the two coloured release buttons inwards and at the same time pull the infuser outwards (fig. 42);  
5. Soak the infuser in water for about 5 minutes, then rinse under the tap;  
**Important!**  
RINSE WITH WATER ONLY  
NO WASHING UP LIQUID - NO DISHWASHER  
6. Clean the infuser without using washing up liquid as it could be damaged.  
7. Use the brush (C5) to remove any coffee residues left in the infuser housing, visible through the infuser door;  
8. After cleaning, replace the infuser by sliding it onto the internal support, then push the PUSH symbol fully in until it clicks into place;  
9. Once inserted, make sure the two coloured buttons have snapped out;  
10. Close the infuser door;  
11. Put the water tank back.

**16.10 Cleaning the milk container (D)**  
Clean the milk container each time you prepare milk as described below:  
1. Lift the milk container lid (D1) (fig. 20);  
2. Remove the milk spout (D7), milk spout extension (D8) and milk intake tube (D9) (fig. 44);
3. Turn the froth adjustment dial (D3) clockwise to the "Insert" position (fig. 45) and pull;
4. Turn and remove the milk container connector (D5) (fig. 46).

5. All components and the container are dishwasher safe, placing them in the top basket. If you do not have a dishwasher, wash by hand as described in the note at the end of the section.
6. Make sure there are no milk residues on the hollow and groove under the dial (fig. 47);
7. If necessary, scrape the groove with a toothpick;
8. Rinse inside the froth adjustment dial seat and milk container connector hole with running water (fig. 48);
9. Check that the intake tube and spout are not clogged with milk residues;
10. Reassemble all the lid components;
11. Attach the lid back on the milk container.

Please note: washing by hand
Washing in a dishwasher guarantees the perfect hygiene of all the milk container components. When washing by hand, wash all components of the milk container thoroughly with hot water and immerse them in a basin of hot water for 30 minutes before proceeding as described in point (6).

17. DESCALING ⚠️

**Important!**
- Before use, read the instructions and the labelling on the descaler pack.
- It is important to use De’Longhi descaler only. Using unsuitable descaler and/or performing descaling incorrectly may result in faults not covered by the manufacturer’s guarantee.
- Descaler could damage delicate surfaces. If the product is accidentally spilt, dry immediately.

### To descale

<table>
<thead>
<tr>

<tr>
<td>Time</td>
<td>~50min</td>
</tr>
</tbody>
</table>

Descaler the appliance when the corresponding message appears on the display (B5). To descale the appliance immediately, press “OK” and follow the instructions from point (8).
To descale the appliance later, press “Cancel”. The [ 符号 ] symbol (B7) appears on the homepage (B) to remind you that the appliance needs descaling. (The message appears each time you turn the appliance on).
To access the descaling menu:
1. On the display, press the settings menu icon (B6);
2. Select “Descale”;
3. Press “Next” to enter the guided descaling procedure;
4. Press “OK” to start;
5. Insert the hot water spout (C7) (fig. 7);
6. Remove and empty the drip tray (A24) and coffee grounds container (A25) (fig. 11), then put both back in the appliance and press “Next”;
7. Remove the water tank (A20), lift the lid (A19) and (if inserted) remove the filter (C7);
8. Pour the descaler into the tank up to the level A marked inside the tank (equal to one 100ml packet), then add water (1 litre) up to level B (fig. 49). Put the water tank (with lid) back in the appliance, close the front door and press “Next”;
9. Place an empty 2 litres container under the spouts (fig. 8). Press OK to start descaling (“Back” to go back to the previous screen or “Cancel” to exit the procedure, remembering to remove the descaling solution from the tank).
9. To access the descaling menu:
   turn the appliance on)
10. The appliance needs descaling. (The message appears each time you

---

### 18. SETTING WATER HARDNESS

The descaling alarm is displayed after a period of time established according to water hardness. The machine is set by default for a hardness value of "Level 4". The machine can also be programmed according to the hardness of the mains water in the various regions so that the machine needs to be descaled less often.

#### 18.1 Measuring water hardness

1. Remove the "Total hardness test" indicator paper (C1) from
2. Immerse the paper completely in a glass of water for one
3. Remove the paper from the water and shake lightly. After about a minute, 1, 2, 3, or 4 red squares form, depending on the hardness of the water. Each square corresponds to one level.

#### 18.2 Setting water hardness

1. On the display (B5), press the settings menu icon (B6);
2. Select "Water hardness";
3. Carry out the procedure described in the previous section and measure water hardness;
4. Press the dot corresponding to the water hardness measured previously as indicated in the following table:

<table>
<thead>
<tr>
<th>Total Hardness test (C1)</th>
<th>Water hardness</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="https://example.com" alt="Green Red" /></td>
<td>Level 1</td>
</tr>
<tr>
<td><img src="https://example.com" alt="Green Red" /></td>
<td>Level 2</td>
</tr>
<tr>
<td><img src="https://example.com" alt="Green Red" /></td>
<td>Level 3</td>
</tr>
<tr>
<td><img src="https://example.com" alt="Red" /></td>
<td>Level 4</td>
</tr>
</tbody>
</table>

5. The machine is now reprogrammed with the new water hardness setting.
6. Press "<" to go back to the homepage (B).

---

### 19. WATER SOFTENER FILTER

Certain models are fitted with a water softener filter (C7). If this is not the case with your model, you are recommended to purchase one from De’Longhi Customer Services.

To use the filter correctly, follow the instructions below.

---

![Diagram](https://example.com)
19.1 Installing the filter
1. Press the settings menu (B6);
2. Select "Water filter";
3. Press "OK" to enter the guided procedure
4. Remove the filter from the packaging and turn the date indicator to view the next two months (fig. 50);  

Please note:
The filter lasts about two months if the appliance is used normally. If the coffee maker is left unused with the filter installed, it will last a maximum of three weeks.
5. Press "Next" to continue ("Back" to go back to the previous screen; "Cancel" to cancel the operation);
6. To activate the filter, run tap water through the hole in the centre of the filter (fig. 51) until it comes out of the openings at the side for more than a minute. Press "Next";
7. Extract the water tank (A20) (fig. 3) and fill with water; insert the filter in the water tank and immerse it completely for about ten seconds, sloping it and pressing it lightly to enable the air bubbles to escape (fig. 52). Press "Next";
8. Insert the filter in the filter housing (fig. 53) and press as far as it will go; press "Next";
9. Close the tank with the lid (A19), then put the tank back in the machine (fig. 5).
10. Insert the descaling spout (C7). Press "Next";
11. Position an empty container with a minimum capacity of 0.5 litres under the descaling spout (fig. 8) and press "OK" to activate the filter;
12. The appliance delivers hot water, then stops automatically. Press "OK" to go back to the homepage (B);
13. The filter is now active and you can use the coffee machine.

19.2 Replacing the filter
Replace the filter (C7) when the corresponding message appears on the display (B5). To replace the filter immediately, press "OK" and follow the instructions from point 4. To replace the filter later, press "Cancel". The symbol (B9) appears on the display to remind you that the filter needs replacing.
To replace, proceed as follows:
1. Press the settings menu (B6);
2. Select "Replace water filter" and press "Next";
3. Press "OK" to enter the guided procedure;
4. Extract the water tank (A20) and exhausted filter. Press "Next" to continue ("Back" to go back to the previous screen; "Cancel" to cancel the operation);
5. Follow the operations described in the previous section from point (4).

Please note:
After two months (see date indicator) or when the appliance has not been used for 3 weeks, you should replace the filter even if the message has not yet been displayed.

19.3 Removing the filter
If you want to use the appliance without the filter (C7), you must remove it and notify the appliance of its removal. Proceed as follows:
1. Press the settings menu (B6);
2. Select "Remove water filter" and press "Next";
3. Extract the water tank (A20) and exhausted filter. Put the tank back in the appliance (fig. 6);
4. Press "OK" to confirm removal of the filter;
5. The change has been saved. Press "OK" to go back to the homepage (B).

Please note!
After two months (see date indicator) or when the appliance has not been used for 3 weeks, you should replace the filter even if the message has not yet been displayed.

20. TECHNICAL DATA
Voltage: 220-240 V ~ 50-60 Hz max. 10 A
Power: 1450 W
Pressure: 1.9 MPa (19 bars)
Water tank capacity: 2.2 l
Size LxDxH: 262x485x390 mm
Cord length: 1750 mm
Weight (depending on models): 13 / 12.2 kg
20.1 Tips for Energy Saving

- To reduce energy consumption, after delivering one or more beverages, remove the milk container (D) or accessories.
- Set auto-off to 15 minutes (see section “6.8 Auto-off”);
- Enable Energy Saving (see paragraph “6.9 General”);
- When requested by the machine, perform the descaling cycle.
